| 20) Fii | nd the missing term in 3 : 4 = 12 :                                                                                                                                                                                                                                                                                            |          |   |      |         |         |

23) Write the ratio of the following and simplify:

21) Using 3 and 12 as means, write any two proportions.

 $22) \ \ \text{If the cost of a book is Rs. 12, find the ratio of 2, 5, 7 books to their cost. What do you observe from this?}$ 

The ratio of 81 to 108

Part-E

6 x 3 = 18

24) Write the ratio of the following and simplify:

The ratio of 30 minutes to 1 hour and 30 minutes

25) Write the ratio of the following and simplify:

The ratio of 60 cm to 1.2 m.

- 26) Seema's monthly income is Rs. 20,000 and her savings is Rs. 500. Find the ratio of
  - i) the monthly income to the savings
  - ii) the monthly income to the expenses
  - iii) savings to the expenses.
- 27) Out of 50 students in a class, 30 are boys. Find the ratio of
  - i) Boys to the total number of students
  - ii) Girls to the total number of students
  - iii) Boys to the Girls

From the given figure, find the ratio of

- i) Number of triangles to Number of circles
- ii) Number of circles to Number of squares
- iii) Number of triangles to Number of squares
- iv) Number of circles to total number of figures
- v) Number of triangles to total number of figures
- vi) Number of squares to total number of figures
